A highly alkaline liquid detergent designed primarily for use in CIP applications on the food processing and brewery industries. It is suitable for use in water hardness up to 400ppm as CaCO₃ and can be used for cleaning HTST plant.

FEATURES

POWERFUL blend of sequestrants.

CONCENTRATED combination of soil suspending, scale removing properties.

DEGREASER Low foam non-ionic surfactants which suppress foam generated during the cleaning process.

APPLICATION

A caustic based detergent for use in CIP and bottle washing applications in the food and beverage industry. Designed to be low foaming under high turbulent conditions in order to provide improved cleaning efficiency and easier rinsing.

DIRECTIONS

Low concentration required i.e. 0.5% v/v depending on soil concentrations.
