An effective rust and scale remover for renovating old metal items, or in the process of cleaning and decaling of production components.

FEATURES

VERSATILE Removes rust, cleans and dissolves oxide films from steel, brasses and bronzes.

BRIGHTENS Produces a clean bright semi polished finish.

INHIBITED 101 is inhibited to reduce any potential effect of the acid components of the product on the metal surface.

DIRECTIONS

101 is ideally used as a concentrate in a dip tank or may be diluted with up to 5 parts water for application by brush.

CAUTION: Not suitable for alloys containing high levels of zinc or magnesium. The colour of copper alloys may be affected.
