England

An alkaline cleaner and chlorine-containing disinfectant solution used primarily for the cleaning and removal of yeast and bacteria from beer delivery lines and equipment.

FEATURES

NON-TAINTING Does not contain synthetic detergents, surfactants or bactericides.

POWERFUL Combination of alkali and chlorine disinfectant.

NON-FOAMING Does not foam and is easy to rinse and flush through the system.

APPLICATION

Principally for cleaning beer lines used in bars, pubs, clubs and restaurants.

DIRECTIONS

Use as directed by the equipment manufacturer. This will usually be between 1:60 and 1:100.
