Specially developed for use in the cabinet glasswash machines used in bars and restaurants. The formula has proved effective in removing beer and soft drink residues.

FEATURES

CLEANS Removes yeast residues from beer glasses, colourings from soft drinks and grease from finger marks.

SPARKLING Combination of surfactants and detergents leaves glassware sparklingly clean.

SANITISES Contains 0.3% available chlorine to act as a sanitising agent.

APPLICATION

Principally in cabinet glasswash machines for cleaning glassware used by bars and restaurants.

DIRECTIONS

Use as directed by the equipment manufacturer. This will usually be between 1:250 and 1:400 as a proportion of the water
