M137 Low Foam Carpet Shampoo is designed specifically for use with hot water extraction machines.

FEATURES

HIGH SUSPENSION Properties enable the machine to effectively remove solid soils

NEUTRAL M137 may be regarded as a neutral ensuring little risk of affecting carpet colouring

RESIDUE FREE Contains no surfactants and leaves no sticky residues to attract dirt.

APPLICATIONS

Suitable for use with all extraction type cleaning machines and most carpet materials. (Check a small area to ensure that the carpet is dye-fast)

DIRECTIONS

Use diluted at 1:16 in hot water. When using the machine ensure that as much water is extracted as possible to reduce risks of shrinkage. Heavy tread areas may be pre-spotted using a solution of 137 at 1:3 in cool water using a hand trigger sprayer before general cleaning.
