M160F is a powerful heavy duty traffic film remover for commercial vehicles, buses, coaches, heavy plant, agricultural vehicles.

FEATURES

POWERFUL concentrated product designed for fast removal of the most stubborn grime from heavily used vehicles.

SOFTENED added water softeners enable product to perform equally well in hard or soft water areas

VERSATILE suitable for use with pressure washers or manual cleaning using either hot or cold water.

DIRECTIONS

For use with pressure washers, set the injection rate to between 0.5% and 1%, depending on cleaning strength required. Spray wash the vehicle working steadily from bottom to top. Turn off the chemical feed and rinse away the product beginning at the top.

For manual cleaning, dilute product at 50:1 and for engine and chassis cleaning dilute at 20:1.
