Dudley
DY2 8TP
England

An all-round penetrating fluid and maintenance solvent, 177 is free of chlorinated solvents and contains a mixture of additives to assist rust removals together with a refined mineral oil to give good lubrication and a dewatering component.

FEATURES

MOISTURE DISPLACING can be used as a dewatering spray and will still penetrate damp components

FAST penetrates quickly into rusted nuts, bolts and components.

PROTECTS 177 imparts a degree of protection to the metal surface once free.

DIRECTIONS

Apply using a metal or solvent resistant sprayer or allow smaller components to soak in the fluid.
