MSH Chemical Manufacturing Limited
Shaw Road
Dudley
DY2 8TP
England

Mainly used for cleaning baking trays and utensils usually in combination with automatic washing equipment in bakeries and other food manufacturing establishments.

FEATURES

EFFECTIVE Removes baking residues leaving trays spotless.

TOLERANT Effective in hard water areas.

ECONOMICAL Used at dilution ratios of between 1% & 2%.

APPLICATION

Ideal for general use in areas of baking and cooking, whether products are bread, pastries or confectionary. Effective in hard and soft water areas.

DIRECTIONS

Use as directed by the equipment manufacturer and according to the degree of soiling normally encountered. Dilution will usually be between 1:100 and 1:50 as a proportion of the wash water.
