MSH Chemical Manufacturing Limited
Shaw Road
Dudley
DY2 8TP
England

Designed to protect and lubricate conveyor slats or chains, as well as tracks to prevent excessive wear and breakage caused by pin seizure.

FEATURES

EFFECTIVE Combines very high detergency with good lubrication.

TOLERANT Effective in hard water areas.

ECONOMICAL Used at dilution ratios of between 1% & 2%.

APPLICATION

Ideal for use in the dairy industry and can be used in the brewing and soft drinks industry.

DIRECTIONS

Use as directed by the equipment manufacturer. Dilution will usually be between 1:100 and 1:50 as a proportion of the wash water.
