A low corrosivity acid formulation based upon phosphoric acid designed for the removal of scale deposits and splashes on stainless steel.

FEATURES

LOW CORROSIVENESS Powerful yet non corrosive towards stainless steel.

LOW TOXICITY Phosphoric acid has a low toxicity and is included as a component of many soft drinks

APPLICATION

In food processing areas, kitchens and places where stainless steel needs to be cleaned.

DIRECTIONS

Apply diluted with up to ten parts of water using a soft cloth.

CAUTION: Avoid contact with die cast zinc fittings.
